For a complete list of their qualification, please visit the [SelfDevelopment.biz](http://SelfDevelopment.biz) website.

## DISCOVERING PAST LIVES

Everything in the universe is elliptical or circular in motion & reoccurs in **cyclical** patterns, from the atomic up to the Galactic. So it's not that amazing that we **cycle** through life as well as lives. Just because a phenomenon can't be explained, doesn't disprove it. As Saint Augustine wrote, "Miracles don't happen in opposition to the laws of science, but in opposition to the **known** laws of science." So it would now seem that space is no longer the final frontier...the hereafter is!

**"WHAT THE CATERPILLAR CALLS THE END,  
THE REST OF THE WORLD CALLS  
A BUTTERFLY." - LAO TSI**

We sometimes think like caterpillars. Most people presume that because someone has died, they no longer exist. A caterpillar would appear dead, as it seals its silk tomb, never to be seen again in the same form. However, in a brilliant example of transformation/reincarnation, the butterfly emerges, without a single solitary caterpillar cell! The cells in a caterpillar are not the same as the ones in a butterfly. Only the DNA is, proving that the life force, Soul or energy of the caterpillar lives on after death.

The same is true with humans. Scientists have proven that 98% of the cells in your body are replaced every year. In the same way that your Soul skips from dead cells to living cells, it also does the same with your lives. Simply put, your body is not you. If you were your body & both your legs were amputated, it follows that part of your consciousness would be lost along with your legs. As Dr Deepak Chopra puts it, "We live under the impression that we are human beings, having occasional spiritual experiences, while in fact we are spiritual beings, having occasional human experiences."

Nothing ever leaves the Universe, it only ever changes form. When you burn a sheet of paper, it doesn't disappear, it merely transforms its atoms. If the Soul is like everything else in existence, than it too never leaves & only ever changes form (transforms). The Soul is a form of energy & like energy can't be created or destroyed. So, to the caterpillar's friends, their amigo appears dead the day the silk tomb is sealed. But like others that have been entombed following death & arisen, so too the beautiful butterfly rises again. Metamorphosis is just a fancy way of saying transformation or reincarnation.

From the Bhagavad Gita (Song of the Lord) an insightful Sanskrit poem; **“As a man casting off worn-out garments takes other new ones, so the dweller in the body casting off worn-out bodies takes others that are new. Certain indeed is death for the born & certain is birth for the dead; therefore over the inevitable you should not grieve.”**

Henry Leo Bolduc, describes a myth about the ancients that came to earth, bringing with them the secrets of eternity. They worried about how to hide these great secrets until mankind was spiritually ready to appreciate & appropriately use them. One lamented, “If we hide them on land, people will conquer the land & discover them.” Another commented, “If we hide them in the sea, mankind will reach the very bottom of the sea.” A third observed, “If we hide them in space, men & women will one day soar into space.” They pondered. Then the wisest said, “Let us hide these secrets in the last place they will think to search. Let us hide the secrets in their own minds.” This proved to be the perfect hiding place. Not until recently has mankind dared to . . .
